### About the University

Mother Teresa Women's University, named after the Nobel Laureate and humanitarian Mother Teresa, is the only Women's University in Tamil Nadu. Established in 1984 under Act 15 of the Tamil Nadu Legislature and recognized by the UGC under Sections 12(b) and 12(f), the university is dedicated to advancing women's education and empowerment. Guided by the motto "Empowering Women through Education," it focuses on teaching, research and extension activity. With 18 academic departments offering diverse programme and research centres in Chennai, Madurai, and Coimbatore, the university upholds academic excellence and promotes holistic development for women.

### About the Department

The Department of Biotechnology was established in 2002 and currently offers M.Sc. (Integrated), M.Sc. Biotechnology, M.Sc Botany and Ph.D. programme in Biotechnology. The department has been committed to providing students with high-quality education and robust research opportunities. To enhance infrastructure and foster vibrant research, faculty members have secured funding from various national agencies such as UGC, DBT-FIST, DST, NABARD, TNSCHE and TNSCST. The department is well-equipped with state-of-the-art instruments and advanced research facilities. The quality of research is evidenced by numerous publications, patents, and Geographical Indication (GI) recognitions achieved by the department. Furthermore, collaborative research projects have been undertaken with organizations in Malaysia, South Korea, South Africa, and Canada. Memorandums of Understanding (MoUs) have also been signed with several reputed International Universities, reflecting the department's commitment to global academic and research collaboration.

### About the Conference

The International Conference on Advances in Biosciences and Biotechnology (ICABB 2026) serves as a premier global forum that brings together researchers, academicians, policymakers, and industry leaders to engage in meaningful dialogue on the state-of-the-art and revolutions in the fields of biosciences and biotechnology. Designed to foster intellectual exchange and interdisciplinary collaboration, the conference provides a dynamic platform for participants to present cutting-edge research, share practical insights, and forge partnerships that drive scientific progress and technological innovation. The conference is built around a comprehensive and integrative theme, aiming to bridge the gap between fundamental scientific research and its real-world applications across various domains of life sciences. By addressing both theoretical advancements and applied solutions, ICABB encourages cross-sectoral discussions that are essential for tackling complex biological challenges and promoting sustainable development in healthcare, agriculture, environment, and industry.
